BESSEM BOUSSELMI

Industrial Operations & Technology Leader | PMP® Certified | Engineering & R&D; Director

France / Tunisia | Contact@bousselmi.tn | +33 0776212854 / +216 25 288 647

PROFESSIONAL SUMMARY

Senior engineering and operations leader with over 9 years of experience managing multidisciplinary teams and delivering complex technology and industrial projects across Europe and North Africa. PMP® certified with strong expertise in embedded systems, product industrialization, and cross■functional leadership. Proven ability to coordinate engineering, manufacturing, and operational teams while driving performance, quality, and delivery objectives. Seeking to leverage leadership and operational management expertise in a Site Director or Industrial Operations leadership role.

PROFESSIONAL EXPERIENCE

Linux Embedded System Project Manager – Sagemcom (Tunisia) Oct 2025 – Present

• Lead development and industrial deployment of embedded Linux telecom systems.

• Coordinate cross■functional teams including engineering, quality, and production stakeholders.

• Manage planning, resource allocation, and operational execution for complex technical programs.

• Ensure alignment between R&D, manufacturing, and delivery timelines.

R&D Team Manager – Nokia (Hungary) Jan 2025 – Sept 2025

• Managed and mentored a multidisciplinary R&D team of 16 engineers and testers.

• Oversaw delivery of reliable software for GSM■R, 2G, 4G and 5G network systems.

• Coordinated collaboration between software, integration, QA and architecture teams.

• Implemented agile processes improving efficiency and reducing issue resolution time by 25%.

Embedded Systems Team Leader – BMW Group (Germany) Jan 2024 – Jan 2025

• Leadership role in next■generation infotainment platform involving 4000+ engineers.

• Managed release planning and cross■team coordination.

• Optimized integration processes reducing build time by 40%.

Senior AI Embedded Engineer – Tuito (France) Nov 2022 – Dec 2023

• Developed embedded Linux platforms for AI edge devices.

• Integrated neural network models for real■time sensor processing.

Senior Embedded Software Engineer – Géothentic (Canada) Aug 2021 – Jun 2022

• Developed secure boot and embedded systems for ARM platforms.

• Delivered automotive software compliant with ISO 26262 standards.

Product & R&D Leader – Genical (Tunisia) Jun 2017 – Aug 2021

• Led development and industrialization of IoT products from concept to market.

• Managed hardware, firmware, cloud teams and manufacturing coordination.

• Selected manufacturing partners and supervised production preparation.

LEADERSHIP & OPERATIONS MANAGEMENT

• Team leadership and multidisciplinary engineering management
• Cross■functional program and project management
• Product industrialization and manufacturing coordination
• Operational planning and execution
• Continuous improvement and performance optimization
• International stakeholder management
• Resource planning and operational reporting

EDUCATION & CERTIFICATIONS

Project Management Professional (PMP®) – Project Management Institute

Computer Engineering Degree – Mobile Embedded Systems & Software
